Subject: RE: May 12 tour of tire crumb facility

ORD has two spaces available, so someone can go. Why don't you talk with Kacee to see if Tom is interested, and then decide?

Bob would be interested but seems like space is tight. I would need to move one meeting so let me know if he is an option.

Thanks

We've scheduled a tour on May 12, from 1 – 3:30, of the Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]

Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]

Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))] processes whole tires at its main facility into 4" pieces, then sends them to the Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]

Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))] where the pieces are reduced into rubber mulch. The tailings from the mulch processing are used to make the various sizes of tire crumb, including crumb for turf infill.

We can bring 10 people with us to tour these facilities. So far, OLEM is bringing 5 people and CPSC will send 2 scientists. I will also attend, so we have 2 available slots if anyone else from ORD wants to go.

You are welcome to discuss with Fred or me to decide if anyone else from ORD will go. Please let me know if you have any questions. Thanks.

Jackie
